

Pwaves Solutions Pvt Ltd participated in the *7th Edition Sustainability Summit & Awards 2025* in Bengaluru, joining industry leaders to discuss how organizations can move from climate ambition to executable, business-aligned action.

The session was moderated by [Ambuli Nambi Kothandaraman](#), Head of Sustainability (Consumer Business Group), Tata Consultancy Services, and included insights from:

[Sunanda Sharma](#), Head of Sustainability, AU Small Finance Bank

[A Balaji](#) Head – Sustainability, APAC Region, OFI

[Shrinivas Naik](#), Associate Vice President – Sustainability, Arvind Ltd.

Yogish HN, Vice President – Business Development, Enerparc Energy

[Shaily Maloo](#), Director, Pwaves Solutions Pvt. Ltd.

[Twinkle Manglani](#), Founder & CEO, Turpinas Energy

Our Founder, **Shaily Maloo**, contributed to the panel *“Onsite Execution – Practicality of Implementing the Sustainable Development Goals.”* Her interventions focused on what it takes to shift sustainability from a parallel initiative to an operating principle inside organizations. The key takeaways were:

- Don't reward sustainability, embed it into performance
- Value chain sustainability starts with the right questions and differentiated expectations focused towards a common goal.
- Stop fitting initiatives into SDGs

We appreciate UBS Forums Pvt. Ltd. for convening a space where leaders could discuss not just goals, but the **practical mechanics** of executing sustainability inside complex organizations. The conversations reflect a broader shift — from intention to implementation, from reporting to redesigning operations for long-term resilience.
